SUMMARY

Front-end developer with experience building responsive web applications using React and TypeScript. Passionate about creating clean, accessible user interfaces and learning modern web technologies. Seeking a front-end developer role where I can contribute to meaningful products and grow as an engineer.

Education

Temple University
Computer Science
Expected Graduation: 2029

Featured Projects

Metrica — SaaS Analytics Dashboard
• Multi-page analytics dashboard with React, TypeScript, and Recharts, includes KPI cards, interactive charts, and data tables with search and Pagination
Nexus — AI ChatBot Application
• Integrated Groq API for real-time AI responses with conversation history persistence via localStorage using React

Coinsight — Cryptocurrency Dashboard
•A real-time crypto dashboard with price tracking and interactive charts with CoinGecko API
• Includes an investment calculator showing historical returns.
• Featured smart search, sortable cards, and AI-powered market insights
